

To Middle School Algebra CD Students and Parents:

Course Description

Algebra AB/Algebra CD is a two-year course. The Algebra course is an introduction to the language and applications of algebra, including development of the real number system, variables, mathematical expressions, linear equations, problem solving, inequalities, polynomials, special products and factoring, graphs, relations and functions, quadratic equations, rational and radical expressions, and basic statistics and probability. Students will study the first half of the book (Algebra AB) during the first year and the second half (Algebra CD) during the second year. These courses are based on the California Mathematics Content Standards for Algebra 1.

***All students must pass Algebra in order to graduate from high school. In addition, all students are required to pass the California High School Exit Exam. Approximately 85% of the items in the mathematics section of this exam test 6th and 7th grade content standards and the remaining items test Algebra 1 content.**

Basic Texts

All students are provided with state approved textbooks for this class. Students will need their textbooks both at school and at home every day.

Student Expectations

Students who expect to succeed must take an active part in their Algebra class, complete all assigned work, perform well on quizzes and tests, and attend class regularly. Students' grades are based on homework, classwork, Cornell notes, open-ended math questions, quizzes, tests, and other assessments such as presentations and projects.

Cornell Notes

Students are expected to take notes during instruction, which they can refer to for homework and test preparation. Notes include vocabulary, descriptions, examples, visual models, and summaries to create a learning record of math concepts and processes learned.

Homework

Homework is assigned daily, and all work must be shown for credit. This is an area in which parents can take an active role. Parents should provide students with an appropriate work area and check their child's work for neatness and completeness throughout the year. It is important that students study the material, identify any problem areas, and secure additional help immediately if they have any questions. Students may get help on homework Monday through Thursday by calling the Homework Helpline at (562) 437-2859 between 4:00 pm - 6:00 pm.

District Assessments

Algebra CD students take a variety of district assessments. Integer Facts Tests that assess students' proficiency adding, subtracting, multiplying and dividing signed numbers are given throughout the year. At the end of quarter 1, students take a 20-item multiple-choice exam; at the end of quarter 2, students take a 25-item multiple-choice exam; and at the end of quarter 3, students take a 30-item multiple-choice exam. At the end of the school year, teachers administer the LBUSD End-of-Course Exam containing 50 multiple choice questions covering the same math standards as the Algebra 1 Content Standards Test (CST), which is part of the STAR exam.

Calculator Usage

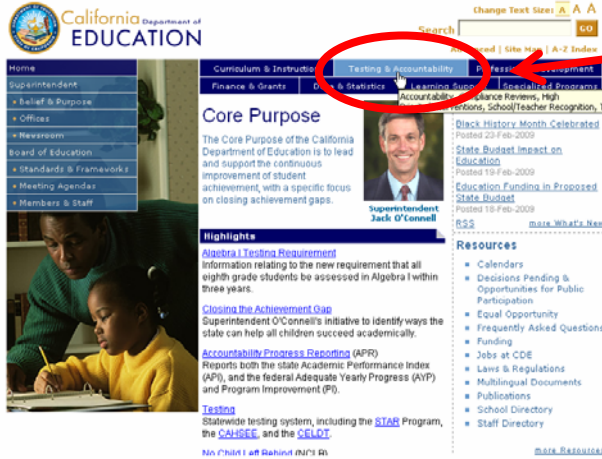

Long Beach Unified School District expects students to be proficient in many skills without the use of a calculator. When appropriate, calculators will be used. The use of calculators is not allowed on the STAR (California Standards) test or any of the district assessments described above.

Standardized Testing and Reporting Program (STAR) for Algebra CD

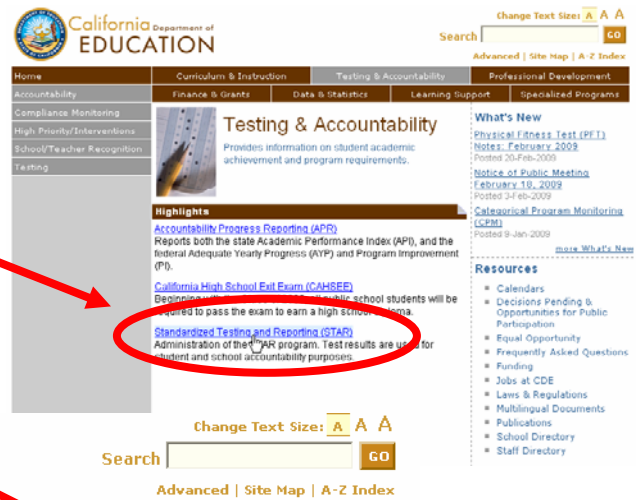

All students in grade eight will take the STAR test in the spring. Students enrolled in Algebra CD take the Algebra 1 California Standards Test (CST). Calculators may not be used for the STAR exam. Released questions can be found on the California Department of Education's website: www.cde.ca.gov (see pages 3 and 4).

Accessing the CST Released Items

1. Go to www.cde.ca.gov
2. Click **Testing and Accountability**

3. Click **Standardized Testing and Reporting (STAR)**

4. Click **Program Resources**

Standardized Testing and Reporting (STAR)

Administration of the Standardized Testing and Reporting (STAR) program. Test results are used for student and school accountability purposes.
